

CARMARTHENSHIRE MOTH GROUP

NEWSLETTER ISSUE No.13

Summer 2009

Editor: Jon Baker (County Moth Recorder for VC44 Carmar)

INTRODUCTION

Welcome to the 13th Newsletter. I have been asked to produce a bulletin summarizing the highlights of the year so far, to keep interest levels going. I've personally not been able to get out and about mothing, but there are a dedicated few who are putting in amazing effort and getting some great rewards. 2009 is supposed to be a "migrant year" by my calculations – there is a notable influx of interesting continental moths every third year, so hopefully traps from here to the end of the year should occasionally hold something exciting and unusual. Ian and I are also planning to target the cliffs in the southwest coastal area beyond Pendine in a few weeks time, an area that is very under-recorded mainly due to difficulty in access, but one that has huge potential, as was shown by Ian at the end of June (see reports).

Compared to the appalling summers of 2007 and 2008 when rain and wind was near constant, we have actually had some decent and prolonged spells of weather so far this year (although as I write this, it is back to rain and wind...). Though there haven't perhaps been as many people trapping this year, there have been some fantastic records. Probably the best of which is....

Devonshire Wainscot *Mythimna putrescens*
The first county record for almost a century.

NATIONAL MOTH NIGHT 18-19th SEPTEMBER 2009

This year NMN will be held over two nights in September, partly to allow for the vagaries of the weather and also for the following reason (taken from the official website):

For the first time ever a national colour marking experiment will take place as part of National Moth Night 2009 activities. Various participating sites in England and Wales will be marking their moth catch in the days leading up to national moth night and we are asking moth recorders and members of the public to look out for these. As the event draws closer we will include images on the website of the colours and parts of the wing that will be marked.

Should you be fortunate enough to find a marked moth **either during the event or afterwards** then please let us know promptly by telephoning 01326 290287 or emailing atropos.editor@zen.co.uk

It will be important to provide photographic evidence so that we can specifically find where the moth was marked and when. **Please do not carry out your own marking experiments as this would cause confusion if a marked moth is retrapped.**

So if you do find a colour-marked moth, make sure to photo it and let them know. It seems a long shot to me, but good luck to them.

LATE NEW FOR 2008

Cypress Pug *Eupithecia phoeniceata* – New to the county

After the Annual Report came out I received an e-mail in April from Huw John who had visited Carmarthenshire last year on holiday. He had sent me a list of moths from Pembrey that had included on it **Cypress Pug *Eupithecia phoeniceata***, which being a new species for the county (although there are “Rothamsted Records”) required a specimen or photo to be acceptable. He has since provided me with a photo that he took, and I am happy to accept the record on the back of this. It was caught on 24th August at Pembrey Post Office (SN4201).

Cypress Pug *Eupithecia phoeniceata* Photo : Huw John

HIGHLIGHTS OF 2009 (so far)

BEST OF THE MICROS

609 *Elachista maculicerusella*

16/06/2009	1	Morfa Farm, Johnstown	SN3919	SN31	Jon Baker
------------	---	-----------------------	--------	------	-----------

This is only the 2nd county record. Previously seen by Sam Bosanquet in June 2001 in SN21 (Llyn y gors). Photographed.

Elachista maculicerusella

1170 *Gypsonoma oppressana*

21/06/2009	3	Penclacwydd	SS5398	SS59	Barry Stewart
------------	---	-------------	--------	------	---------------

A new species of Tortricid for the county. Feeds on poplars *Populus nigra* and *P. alba*. Photographed.

Gypsonoma oppressana Photo : Barry Stewart

1421 LARGE TABBY *Aglossa pinguinalis*

27/06/2009	1	Tyrwaun, Pwll	SN4601	SN40	Ian Morgan
------------	---	---------------	--------	------	------------

A new Pyralid for the county found, by Ian Morgan, in a shed (as is typical for this species) at Pwll (SN4601) on 10th July. Photographed.

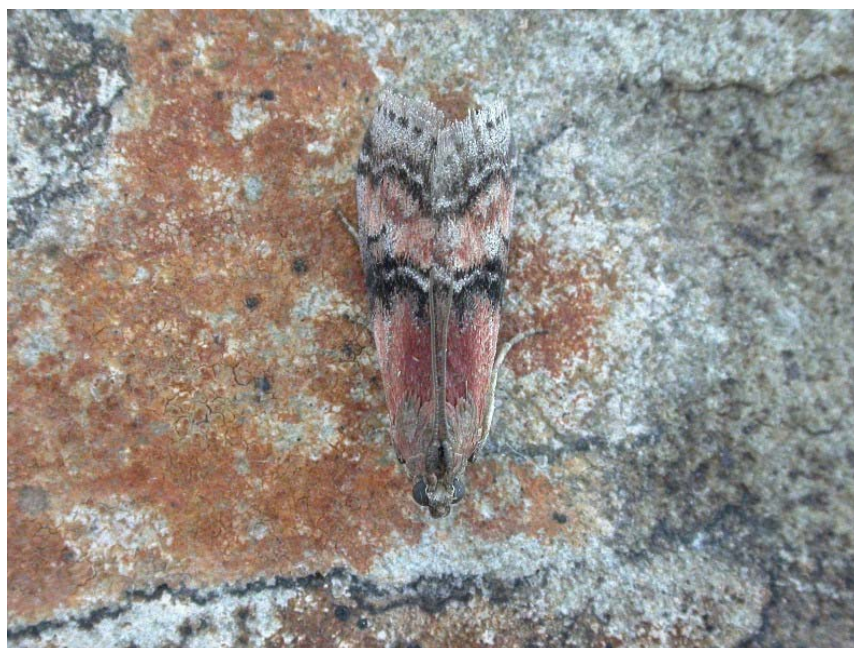

LARGE TABBY *Aglossa pinguinalis*

1445 *Pempelia formosa*

27/06/2009	1	Tyrwaun, Pwll	SN4601	SN40	Ian Morgan, conf. JSB
------------	---	---------------	--------	------	-----------------------

And yes, another new Pyralid for the county, found by Ian Morgan. This little stunner lives on elm *Ulmus*, and was only recorded for the first time in Wales, by Sam Bosanquet in his home county of Monmouthshire, back in 2006. Identity confirmed, and photographed by JSB.

Pempelia formosa

MACRO-MOTHS

Note: in the tables below, a **BOLD** 10km grid ref denotes a new 10km record

1661 ORANGE UNDERWING *Archiearis parthenias*

Previous Records : 8 (SN30, SN32, SN40, SN50, SN53, SN74)

Last recorded : 2008

17/03/2009	1	Tumble CP	SN5412	SN51	Ian Morgan
19/03/2009	5	Mynydd Mawr woodland Park	SN5412	SN51	Ian Morgan
19/03/2009	2	SW of Ty-llwyd	SN5706	SN50	Ian Morgan
20/03/2009	1	E of Cencoed-uchaf	SN4803	SN40	Ian Morgan
20/03/2009	1	Gelli-werdd park, Glanaman	SN6713	SN61	Ian Morgan
20/03/2009	2	near Llwyn Adda	SN6012	SN60	Ian Morgan
20/03/2009	8	Pont y Clerc	SN6111	SN61	Ian Morgan
20/03/2009	10	Pembrey Forest	SN3803	SN30	Jon Baker
21/03/2009	3	E of Cencoed-uchaf	SN4803	SN40	Ian Morgan
21/03/2009	4	Cors Goch, Llanllwch	SN3618	SN31	Ian Morgan
21/03/2009	2	nr Capel Ifan, Pontyberem	SN4910	SN41	Ian Morgan
21/03/2009	1	Pwll Lagoon	SN4601	SN40	Ian Morgan
22/03/2009	1	Pembrey Forest	SN3802	SN30	Ian Morgan
24/03/2009	3	Mynydd Mawr woodland Park	SN5412	SN51	Ian Morgan

Ian has single-handedly knocked this species firmly off the county rarity list. It seems to be fairly widespread, though you still need to have the right weather and the flight period seems to be a window of about a week. Still need to get this species photographed in the county. IKM adds “All records associated with young birch woodland or scrub, with most moths seen midday to late afternoon in bright sunshine; often only brief views as they flew above, or in between, the birches.”

MULLEIN WAVE *Scopula marginepunctata*

1689 MULLEIN WAVE *Scopula marginepunctata*

Previous Records : 1 (SS49)

Last recorded : 1991

29/06/2009	1	Gilman Point	SN2207	SN20	Ian Morgan
29/06/2009	1	Ragwen Point	SN2207	SN20	Ian Morgan

Very excited to see this, and have the chance to photo it. Barry's 1991 record from Pembrey Dunes has for too long been the only county record (and was probably a wanderer there, as it has not turned up again in probably the most intensively trapped part of the county). Ian's pioneering visit to the cliffs west of Pendine paid off big time with this and several other incredible catches. Photo above.

1790 TISSUE *Triphosa dubitata*

Previous Records : 3 (SN51, SN62)

Last recorded : 2008

02/03/2009	6	Garn - large quarry	SN5916	SN51	Mat Ridley
17/04/2009	1	Garn - large quarry	SN5916	SN51	Mat Ridley

Having found this species at Carmel on two occasions last year, Mat has continued to target it in suitable areas and been rewarded. Great stuff. I hope to be able to photo one soon!

1813 HAWORTH'S PUG *Eupithecia haworthiata*

Previous Records : 10 (SN21, SN30, SN31, SN61, SS49)

Last recorded : 2008

29/06/2009	1	Gilman Point	SN2207	SN20	Ian Morgan, det :JSB
------------	---	--------------	--------	-------------	----------------------

Still an uncommon species in the county, due to the scarcity of traveller's-joy *Clematis vitalba*.

THYME PUG *Eupithecia distinctaria constrictata*

1843 THYME PUG *Eupithecia distinctaria constrictata*. **Notable B.**

Previous Records : 1 (SN51)

Last recorded : 1975

29/06/2009	2	Ragwen Point	SN2207	SN20	Ian Morgan, det :JSB
------------	---	--------------	--------	-------------	----------------------

It's been a very long time since E. Pelham-Clinton's only county record from Carmel Woods. So this is a great record of Ian's, and I am glad to have had the chance to photo them too. Photo above.

1859 SLOE PUG *Pasiphila chloerata*

Previous Records : 2 (SN40)

Last recorded : 2007

21/06/2009	5	Penclacwydd	SS5398	SS59	Barry Stewart
------------	---	-------------	--------	-------------	---------------

Barry scored a new 10km record here, with all three records so far being from the Llanelli area. Hopefully it will turn up a little further north and west very soon.

1964 ANNULET *Charissa obscurata*

Previous Records : 8 (SN10, SN30, SN51, SN61)

Last recorded : 2008

29/06/2009	4	Gilman Point	SN2207	SN20	Ian Morgan
------------	---	--------------	--------	-------------	------------

A scarce species and primarily a coastal one in the county.

1979 LIME HAWK-MOTH *Mimas tiliae*

Previous Records : 11 (SN40, SS59)

Last recorded : 2008

05/06/2009	1	Mwdlwscwm Farm, Llannon	SN5307	SN50	Tom & Ace Yates
21/06/2009	1	14 Job's Well Rd, Johnstown	SN3919	SN31	Jon Baker

Since Ian Morgan discovered this species new for the county a few years ago, he and Llanelli have monopolized the records. So it was very nice to see that it has seemingly spread, even as far as my Carmarthen garden! Oddly no records from Pwll this year...

LIME HAWK-MOTH *Mimas tiliae*

1996 ALDER KITTEN *Furcula bicuspis***Previous Records** : 12 (SN32, SN40, SN42, SN53, SN74)**Last recorded** : 2008

22/04/2009	1	Tyrwaun, Pwll	SN4601	SN40	Ian Morgan
28/05/2009	n/c	Glanrhyd, Brechfa	SN5030	SN53	Dave & Jan Bannister

Always nice to see this tidy little moth, which remains very local and rarely caught.

2038 MUSLIN FOOTMAN *Nudaria mundana***Previous Records** : 7 (SN20, SN51)**Last recorded** : 2008

23/06/2009	2	Palycwrt	SN6818	SN61	Ian Morgan
------------	---	----------	--------	-------------	------------

An upland record is to be expected, and a new 10km square. This species seems to have an affinity with calcareous rocks (its larvae feed on lichens) with previous records from Gelli Aur (where the mansion is built of limestone) and near Laugharne on base-rich ORS cliffs. The Palycwrt site lies on Carboniferous Limestone.

2090 CRESCENT DART *Agrotis trux lunigera***Previous Records** : 10 (SN10, SN31, SS59)**Last recorded** : 2008

29/06/2009	2	Ragwen Point	SN2207	SN20	Ian Morgan
------------	---	--------------	--------	-------------	------------

Though a new 10km square, it is just along the coast from the previous records.

2114 DOUBLE DART *Graphiphora augur***Previous Records** : 33 (SN40, SN44, SN53, SN61, SS59)**Last recorded** : 2008

20/06/2009	1	Capel Isaac, NE of	SN6028	SN62	Vaughn Matthews, det: JSB
27/06/2009	1	Gelly, Rhydcymerau	SN5739	SN53	Julian Wormald
02/07/2009	1	Gelly, Rhydcymerau	SN5739	SN53	Julian Wormald

Very local in the county – the 33 records are nearly all from just one site in SN53. A nice find for Vaughn who has just taken up mothing in the county.

2140 WHITE-MARKED *Cerastis leucographa***Previous Records** : 15 (SN12, SN32, SN51, SN53)**Last recorded** : 2008

29/03/2009	1	Cnwc y Llwyn	SN5131	SN53	Sam Bosanquet
30/03/2009	1	Bryn Llinos, Carmel	SN5816	SN51	Mat Ridley
12/04/2009	1	Gelly, Rhydcymerau	SN5739	SN53	Julian Wormald
15/04/2009	1	Cnwc y Llwyn	SN5131	SN53	Sam Bosanquet
19/04/2009	1	Cnwc y Llwyn	SN5131	SN53	Sam Bosanquet

Continuing with the run of recent records, the majority as usual coming from the Brechfa area.

2142 BEAUTIFUL YELLOW UNDERWING *Anarta myrtilli***Previous Records** : 9 - of which 5 are larval (SN31, SN53, SS59)**Last recorded** : 2008

29/06/2009	1	Ragwen Point	SN2207	SN20	Ian Morgan
------------	---	--------------	--------	-------------	------------

A new part of the county for this very pretty day-flying moth that is probably under-recorded and not quite as scarce as the five imago records suggest.

2145 NUTMEG *Discestra trifolii***Previous Records** : 13 (SN40, SS49, SS59)**Last recorded** : 2008

04/06/2009	3	Dyfatty Park	SN4500	SN40	Ian Morgan
12/06/2009	7	Dyfatty Park	SN4500	SN40	Ian Morgan
13/06/2009	12	Dyfatty Park	SN4500	SN40	Ian Morgan
14/06/2009	4	Dyfatty Park	SN4500	SN40	Ian Morgan
22/06/2009	6	Dyfatty Park	SN4500	SN40	Ian Morgan
02/07/2009	5	Dyfatty Park	SN4500	SN40	Ian Morgan

Ian seems to have stumbled upon Nutmeg Central with this one! Has always been an incredibly scarce species, occurring exclusively in the SE coastal area. I had suspected it was a migrant only species, but it would seem otherwise. IKM adds: "Dyfatty Park (just east of Burry Port) is a new commercial facility with lots of `wasteground` -with plenty of the larval foodplant – goosefoots and the like."

2162 GLAUCOUS SHEARS *Papestra biren***Previous Records** : 6 (SN32, SN53, SN61, SN71)**Last recorded** : 2008

28/05/2009	1	Palycwrt	SN6718	SN61	Ian Morgan, det: JSB
03/06/2009	1	Gelly, Rhydcymerau	SN5739	SN53	Julian Wormald

A species of moorland and mountains that sometimes wanders.

GLAUCOUS SHEARS *Papestra biren*

2171 MARBLED CORONET *Hadena confusa*

Previous Records : 3 (SN40, SN51, SS59)

Last recorded : 1991

29/06/2009	1	Ragwen Point	SN2207	SN20	Ian Morgan, det :JSB
------------	---	--------------	--------	------	----------------------

Nearly 20 years since the last of a flurry of three records. I had suspected that the species was no longer resident in the county, but this record seems to say otherwise. Certainly the habitat for this record is far more appropriate. Lives on sea campion *Silene uniflora* and rock sea-spurrey *Spurgularia rupicola*.

MARBLED CORONET *Hadena confusa***2184 NORTHERN DRAB *Orthosia opima***

Previous Records : 2 (SN53)

Last recorded : 2007

22/04/2009	1	Cnwyc y Llwyn	SN5131	SN53	Sam Bosanquet
------------	---	---------------	--------	------	---------------

This time caught on the south side of Brechfa Forest. Would be nice to score it a little further afield.

2202 L-ALBUM WAINSCOT *Mythimna l-album*. Notable B.

Previous Records : 4 (SN10, SN20, SN30)

Last recorded : 2006

13/06/2009	1	E of Burry Port	SN4600	SN40	Ian Morgan
29/06/2009	3	Gilman Point	SN2207	SN20	Ian Morgan
29/06/2009	2	Ragwen Point	SN2207	SN20	Ian Morgan

There haven't been any county records of this species since the initial four by Sam and myself in the autumn of 2006. So very nice to have some summer records, and also one from further east. Clearly there is a small coastal breeding population.

2204 OBSCURE WAINSCOT *Mythimna obsoleta*

Previous Records : 21 (SN40, SS49, SS59)

Last recorded : 2008

03/06/2009	2	Erw Las, Llwynhendy	SS5399	SS59	Ian Morgan
04/06/2009	2	Dyfatty Park	SN4500	SN40	Ian Morgan
12/06/2009	1	Dyfatty Park	SN4500	SN40	Ian Morgan
20/06/2009	1	Ffrwd Fen	SN4102	SN40	Ian Morgan
21/06/2009	1	14 Job's Well Rd, Johnstown	SN3919	SN31	Jon Baker

Scoring one in my garden trap in Carmarthen was a surprise, as all previous county records had been from the coastal zone between Pembrey and Llanelli.

2206 DEVONSHIRE WAINSCOT *Mythimna putrescens* Notable A.

Previous Records : 2 HISTORICAL (SN20, SN31)

Last recorded : 1910

29/06/2009	1	Ragwen Point	SN2207	SN20	Ian Morgan, det :JSB
------------	---	--------------	--------	------	----------------------

I was more than pleasantly surprised to find this in a tube presented to me in a batch of moths needing identifying and photographing! The first **modern day** record. Ian, I know is very keen to incorporate historical records – which I personally find have less relevance, but this becomes the 3rd County Record, after ones from 1870 and 1910 in Laugharne and Pendine.

DEVONSHIRE WAINSCOT *Mythimna putrescens*

2235 TAWNY PINION *Lithophane semibrunnea*

Previous Records : 1 (SN40)

Last recorded : 2007

31/03/2009	1	Trosersch Farm	SN5404	SN50	Colin Jones
------------	---	----------------	--------	-------------	-------------

The first county record was as recent as 2007, so great to have another turn up so soon afterwards. Photographed and identification confirmed by JSB.

2237 GREY SHOULDER-KNOT *Lithophane oritopus lactipennis*

Previous Records : 10 (SN32, SN51, SN53, SN74)

Last recorded : 2008

02/03/2009	1	Bryn Llinos, Carmel	SN5816	SN51	Mat Ridley
14/03/2009	1	Garn - bramble glade	SN5916	SN51	Mat Ridley
19/03/2009	1	Cnwc y Llwyn	SN5131	SN53	Sam Bosanquet
02/04/2009	1	Caedwgan, Brechfa	SN5234	SN53	F Sharpley & D Groom

I'm still waiting for an opportunity to photograph this species. It remains a very scarce hibernator, more commonly encountered in spring than autumn.

2250 DARK BROCADE *Blepharita adusta*

Previous Records : 7 (SN51, SN53, SN54, SN61, SN71, SN82)

Last recorded : 2007

28/05/2009	1	Palycwrt	SN6718	SN61	Ian Morgan, det :JSB
------------	---	----------	--------	------	----------------------

Its scarcity in the county is due to its habitat being the remote uplands that are rarely visited. On those occasions when people do trap up a mountain in the right season, this moth often turns up.

2256 SATELLITE *Eupsilia transversa*

Previous Records : 17 (SN20, SN31, SN32, SN40, SN44, SN51, SN53, SN62)

Last recorded : 2008

17/02/2009	1	Bryn Llinos, Carmel	SN5816	SN51	Mat Ridley
17/02/2009	1	Garn - herb paris patch	SN5816	SN51	Mat Ridley
06/03/2009	1	Bryn Llinos, Carmel	SN5816	SN51	Mat Ridley
11/03/2009	1	Tyrwaun, Pwll	SN4601	SN40	Ian Morgan
30/03/2009	1	Garn - bramble glade	SN5916	SN51	Mat Ridley

Another seemingly scarce hibernating species, that is being increasingly recorded in the spring.

2327 CLOUDED BRINDLE *Apamea epomidion*

Previous Records : 8 (SN30, SN40, SN51, SN53, SS49)

Last recorded : 2008

02/07/2009	1	E of Burry Port	SN4600	SN40	Ian Morgan, det :JSB
23/06/2009	1	Carmel Woods	SN5916	SN51	Mat Ridley, conf. JSB

Seemingly increasing, with most of the county records in the last couple of years.

2329 CONFUSED *Apamea furva britannica*

Previous Records : 4 (SN50, SN51, SN61, SN74)

Last recorded : 2008

24/06/2009	48	Mynydd Llangydeyrne	SN4813	SN41	Ian Morgan, conf: JSB
------------	----	---------------------	--------	-------------	-----------------------

A huge number in two actinic traps left out on Mynydd Llangydeyrne by Ian. A new 10km square for this very local species of (primarily) uplands.

2331 SMALL CLOUDED BRINDLE *Apamea unaminis*

Previous Records : 11 (SN33, SN40, SN41, SN50, SN53, SN62, SS59)

Last recorded : 2008

21/06/2009	2	Penclacwydd	SS5398	SS59	Barry Stewart
------------	---	-------------	--------	------	---------------

Always a very scarce species, most often seen in the Llanelli area.

2391 SILKY WAINSCOT *Chilodes maritimus*

Previous Records : 19 (SN30, SN40, SN50, SS49, SS59)

Last recorded : 2006

12/06/2009	1	Dyfatty Park	SN4500	SN40	Ian Morgan
20/06/2009	1	Ffrwd Fen	SN4102	SN40	Ian Morgan
27/06/2009	1	Tyrwaun, Pwll	SN4601	SN40	Ian Morgan

It's been a few years without this species being recorded in the county, which is probably due to trapping habits and lack of targeting than any other factor. It's a scarce species that is rarely seen away from the Pembrey to Llanelli coastal marshes and wetlands.

BEAUTIFUL HOOK-TIP *Laspeyria flexula*

2473 BEAUTIFUL HOOK-TIP *Laspeyria flexula***Previous Records** : 1 (SN61)**Last recorded** : 2006

04/07/2009	1	Tyrwaun, Pwll	SN4601	SN40	Ian Morgan
------------	---	---------------	--------	-------------	------------

Another record to add to the 2006 record (there is also an unsubstantiated “Rothamsted Record” from the 1980s which I do not include in the main county database.). Seems to be creeping westward in Wales generally. Would be nice to be a regular in traps here, as it’s very pretty.

SOME TARGET MOTHS

The following list are some ideas of species that I would love to receive records for, or better still, I would love to have good live specimens available to photograph. I’m providing it as a bit of inspiration:

371 LUNAR HORNET MOTH *Sesia bembeciformis***Previous Records** : 2+ (SN22, SN51) possible records for SN53 and SN74**Last recorded** : 2006**When to look for:** July to early August**Where** : Could occur anywhere. Lives on Willows. Day-flying.**1632 PALE EGGAR** *Poecilocampa populi***Previous Records** : 4 (SN21, SN32, SN33)**Last recorded** : 2003**When to look for:** August to September.**Where** : Woodland, gardens.**1658 OAK LUTESTRING** *Cymatophorima diluta***Previous Records** : Only Rothamsted records. All from SN74.**Last recorded** : not clear.**When to look for:** Late August to September.**Where** : Oak woodland.**1745 MALLOW** *Larentia clavaria***Previous Records** : 1 (SN62)**Last recorded** : 2002**When to look for:** September to early November**Where** : Wherever its foodplant grows. Mallows, hollyhocks, marsh-mallow etc.**1793 CLOAKED CARPET** *Euphyia biangulata***Previous Records** : 3 (SN53, SN83)**Last recorded** : 2008**When to look for:** July**Where** : Damp woodland.**1897 V MOTH** *Macaria wauaria***Previous Records** : 3 (SN61)**Last recorded** : 2005**When to look for:** July and August**Where** : Wherever currants grow.

1942 DOTTED CARPET *Alcis jubata*

Previous Records : 5 (SN53, SN74)

Last recorded : 2006

When to look for: Late June to mid September, peaking in July.

Where : Ancient woodland.

2026 VAPOURER *Orgyia antiqua*

Previous Records : 1 (SN30) – larval only.

Last recorded : 2005

When to look for: July to October

Where : Could occur anywhere. Pembrey MOD is the only previous site. As females are wingless it cannot easily establish new colonies. Flies by day and night.

2254 GREY CHI *Antitype chi*

Previous Records : 1 (SN62)

Last recorded : 1996

When to look for: August and September.

Where : Usually upland moors and open grassy places.

2299 MOUSE MOTH *Amphipyra tragopoginis*

Previous Records : 21 (SN30, SN31, SN40, SN44, SN61, SS49, SS59)

Last recorded : 2001

When to look for: July to September.

Where : Could occur anywhere. A once common species that seems to have mysteriously gone extinct.

2303 STRAW UNDERWING *Thalpophila matura*

Previous Records : 2 (SN40, SN52)

Last recorded : 2003

When to look for: July and August

Where : Grassland, open habitats.

2447 SCARCE SILVER Y *Syngrapha interrogationis*

Previous Records : 1 (SN74) plus several Rothamsted records from the same area.

Last recorded : 1984

When to look for: Late June to mid August

Where : Upland moorlands.

2475 WAVED BLACK *Parascotia fuliginaria*

Previous Records : 1 (SS49)

Last recorded : 2005

When to look for: June and July

Where : Primarily damp woodlands and heaths.

My thanks to all those who have sent me records so far this year:

Ian Morgan, Mat Ridley, Sam Bosanquet, Dave & Jan Bannister, Julian Wormald, Keith Williams, Lizzie Wilberforce, Vaughn Matthews, Tom & Ace Yates, Andrew Lucas, Barry Stewart, Colin Jones, Faye Sharpley & David Groom, and Simeon & Kirsten Jones.

JON BAKER, JULY 14th 2009
